Cable Transits & Penetration Seals
for Fire-Rated Divisions

FIRE
WATER
SMOKE
Ensure Life Safety At Sea

Specified Technologies Inc. (STI) was founded over 25 years ago and has quickly become the industry leader in passive fire protection by providing premium quality, high performance and technologically advanced fire safety products and solutions that help save lives and protect property. Our complete line of products preserve and protect the integrity of vessels and platforms and are tested and manufactured under the strictest quality control standards to withstand the forces of nature, the threat of fire, and the test of time.

STI Marine Firestop Products are approved by major classification societies, including American Bureau of Shipping (ABS), US Coast Guard (USCG), Bureau Veritas (BV), and MED B & D certification. Other approvals may be applied for on an as-needed basis. Contact STI for additional information on approvals.
Build Faster. Improve Quality.

Save Time & Money
- Maximize project savings by avoiding days of designing, planning and scheduling individual cable installations in each transit
- Realize significant material and labor cost savings by eliminating downstream operations
- Simplify cable retrofits without the need to remove or re-seal packing materials

Drastically Reduce Total Install Time
These self-contained devices offer the best-installed cost by allowing you to pick up valuable production hours by eliminating the need to pack transit frames. You avoid complicated sealing operations after installation and gain the flexibility of simple cable expansions on demand.

Improve Efficiency
- Minimize installation time by using this revolutionary one-piece design, ready to install right out of the box
- Simplify logistics with less individual components to manage, order, track, inventory, and deliver to each transit location
- Promote simple remote cable pulls without having to remove, replace, or adjust existing materials
- Virtually eliminate cable pull errors or additions after sealing and simplify expansions and upgrades while at sea or in dry dock

Self-Sealing | Self-Adjusting | Self-Contained
Always Compliant
Fire-Rated Cable Transits

EZ-Path® Marine Cable Transits are the industry’s only zero-maintenance transit device designed to take control of your fire-rated divisions in non-water-tight applications without the need to mechanically seal openings.

Features & Benefits:
- 100% compliant 100% of the time
- Maintenance free
- No activation of the fire sealing system required
- Fully assembled out of the box
- Greater performance reliability
- No putty or sealant required

Applications:
- Accessories adapt the cable transits to ganged configurations, thicker walls, retrofit with previously installed cables

Tested to IMO FTP Code 2010, Part 3
- Class A-0 to A-60
- Class H-0 to H-120 (400 series)
*Consult Factory for Most Current Testing & Approvals

How It Works
Self-Sealing Intumescent Pads
- Provide 100% Sealed Fire & Smoke Protection
- Automatically Adjust to Cable Loads
- Gently Conforms Around Cable Irregularities

Heavy Duty Steel Housing
- Protected with Marine-Grade Powder Coating

50 KSI ABS Grade Steel Mounting Plate
- Easily Welds to Divisions

For Non-Watertight Divisions & Fully Compliant with New IMO FTP6 Criteria.

Easy Installation
1. Cut hole in the division
2. Spot weld device
3. Pull Cables

Easy Cable Retrofits
The 400 Series allows you to adapt the device around existing cabling conditions.
1. Surround cables with device
2. Secure plates around device
3. Weld device to bulkhead or deck

Additional insulation may be required in some designs. Consult Type Approval and installation details for more information.

Available solutions for hard core joiner panels

Specifically Designed For Cruise Line Ships
With only a 75mm (3") projection it is perfect for tight spaces.
Firestop Putty

Marine Firestop Putty is designed to seal small to medium size cable openings in fire-rated divisions.

Marine Firestop Putty is a non-hardening, moldable compound that can be hand-packed into openings for permanent or temporary sealing allowing for cable removal or addition.

Features & Benefits:
- Flexible to accommodate vibration
- Resistant to aging and weathering
- Easily repairable, retrofittable, and installable
- Remains moldable/pliable

Applications:
- Can be used to form flexible, vibration-resistant seals around cables in bulkheads and decks

Firestop Putty coils are available in convenient 15.9 L Pail (3.5 Gallon)

Tested to IMO FTP Code 2010, Part 3
- Class A-0 to A-60
- Class H-0 to H-60 (Deck)
*Consult Factory for Most Current Testing & Approvals

Snap-Seal Cable Plugs

This two-piece device snaps together for easy installation and is ideally suited for single cable penetrations through joiner panels and other types of divisions.

MSS was specifically designed for use with surveillance cameras and provides a split design that can be used with new or previously installed cables.

Features & Benefits:
- Provides rapid intumescent expansion
- Snaps onto cables, plastic and metallic tubing

Applications:
- Ideal for one or more cables or plastic and metallic tubing with a total O.D. 14mm
- Use on data, alarm, security, CCTV or electrical cables

Tested to IMO FTP Code 2010, Part 3
- Class A-0 to A-60
- Class H-0 to H-120 (Bulkheads)
*Consult Factory for Most Current Testing & Approvals
The Fastest & Most Flexible Fire And Water-Tight Sealing System
For Fire-Rated Bulkheads And Decks

M-Pact™ represents the fastest solution for sealing fire-rated cable and pipe penetrations in both watertight and non-watertight divisions. It combines pliable non-combustible filler blanket with advanced watertight MFS sealant.

**Features & Benefits:**
- Quick and Easy to Install
- Safe and Simple to Clean Up
- Meets IMO FTP Code
- Provides Water and Gas-Tight Ratings
- Conforms to Virtually Any Condition
- Can be Modified to Allow for Retrofit

**Applications:**

**Impact Your Bottom Line**
- Cut to Length Filler Dispenser Rolls
  - Packs Easily Between Penetrants
  - Ideal Adhesion for Large or Overhead Applications
  - Supple, Non-Friable Material with No Asbestos
- Cutting Edge Hybrid Polymer Patented Technology
  - Better Water Resistance than Conventional Silicone Sealants
  - Safety First Non-Halogenated Formula

Combine with STI Marine Wrap Strip to seal complex openings with plastic pipes.

**As Simple As 1-2-3**
1. Pack opening with filler material
2. Apply sealant
3. Smooth sealant surface with trowel

Additional insulation may be required in some designs. Consult Type Approval and installation details for more information.
**Firestop Sealant**

This advanced hybrid polymer sealant cures in the presence of atmospheric moisture and is designed for fire-rated divisions.

MFS offers better water resistance than conventional silicone sealants and forms a tight, durable elastomeric seal, preventing the transmission of air, smoke and gasses.

**Features & Benefits:**
- Maintenance-free and simple to install
- Forms flexible, vibration-resistant seals
- Resistant to aging and weathering
- Non-corrosive, non-conductive

**Applications:**
- Ideal for applications where a high degree of water-resistance is required
- For interior or exterior applications in watertight decks and bulkheads

---

**Wrap Strip**

This intumescent wrap strip comes in convenient cut-to-length rolls providing an economical solution for firestopping combustible penetrants.

MWS offers a flexible, high-performance option to seal bulkheads and decks by forming an effective barrier against fire, smoke, and hot gasses.

**Features & Benefits:**
- Provides rapid intumescent expansion
- Forms flexible, water-resistant seals
- Ideal for nonmetallic pipes or pipe insulation
- Can be used in tandem with Marine Firestop Sealant or as a tuck in.

**Applications:**
- Ideal for nonmetallic pipes or pipe insulation
- Can be used in tandem with Marine Firestop Sealant or as a tuck in.
Split Firestop Collars

Split Firestop Collars are factory-manufactured devices designed for use in fire-rated divisions to protect plastic and metallic pipes.

These firestop collars feature a stainless steel shell lined with a molded, intumescent insert that expands with heat more than 60 times to contain the fire to the point of origin, restricting the passage of fire, smoke, and hot gases. They are designed for quick and easy attachment to the bulkhead or deck.

**Features & Benefits:**
- Heavy gauge, chromium rich 316 stainless steel construction.
- Resistant to aging and weathering, no soluble or hygroscopic ingredients.
- Designed for high volume of char and rapid expansion.
- Retrofits around existing metallic and non-metallic pipes.
- Available in many common sizes and won’t damage outside of pipes.

**Applications:**
- Sized to fit common pipe sizes.
- Applications were tested for common pipes including PVC, PVDF, CPVC, Pb, PE, PE-AL, ABS, GRE, GRP, FRP, uPVC, Copper and Steel.

**Applications:**
- Turns and tees to accept plastic and metallic pipes.
- Change of direction to accept plastic and metallic pipes.
- Reduced space solutions for narrow firewalls.
- Architectural fit and finish.
- Used in vertical firestopping applications.

**Applications:**
- Hard core joiner panel solutions are available with the use of our MFC firestop collars.
- Used in vertical firestopping applications.

**Help Prevent Future Failures**

Unlike other devices, STI Marine Collars are engineered so pads firmly grip the pipe until properly attached and don’t slide down in overhead conditions.

**STI**
When pipe vibration occurs, the robust intumescent liner protects pipes from potential damage while other solutions with sharp metal edges make direct contact.

**Others**
Competitive collars have sharp edges that typically scratch and damage plastic pipes due to excessive vibration. Over time, these conditions can cause excessive pipe damage and potential failures.

**GRE/GRP Large Diameter Firestop Collars available in sizes ranging from 300 to 700 mm**

Combine with STI Marine Firestop Putty to seal multiple pipe penetrations.

Hard core joiner panel solutions are available with the use of our MFC firestop collars.

Water-Tight Firestop Collars

Water-tight, factory-manufactured, intumescent device for use as a penetration seal in fire-rated bulkheads and decks.

Water-tight firestop collars are comprised of a stainless steel body with a mild steel flange for easy weld attachment and lined with a molded, intumescent insert that rapidly expands more than 60 times to contain the fire to the point of origin, restricting the passage of fire, smoke and hot gases. A rubber bushing is integrated into the collar to ensure water-tightness.

Features & Benefits:
- Heavy gauge, chromium rich 316 stainless steel construction.
- Provides water-tightness up to 4 bar and gas-tightness up to 1 bar.
- Solid design requires pipe to be inserted through the water-tight bushing.
- Flexible intumescent liner accommodates vibration and will not damage pipe
- Resistant to aging and weathering

Applications:
- Available in 21 different sizes to fit common pipes ranging from 16 mm to 324 mm.
- Applications were tested for common plastic pipes, including PVC, PVDF, CPVC, Pb, PE, PE-AL-PE, ABS and GRL, GRP, FRP, steel and copper pipes through pressure rated bulkheads and decks.

Transitional Firestop Collars

Factory-manufactured devices designed for use in fire-rated divisions to protect transitions between metal and plastic pipes.

The stainless steel shell is lined with a molded, intumescent insert. These easy to install transitional collars can retrofit around existing pipes to restrict the passage of fire, smoke, and hot gases at transitions between plastic pipes and steel pipes or scuppers.

Features & Benefits:
- Durable chromium rich 316 stainless steel construction.
- Resistant to aging and weathering.
- No soluble or hygroscopic ingredients.
- Designed for high volume of char and rapid expansion.
- Will not damage outside of pipe.
- No sealant or welding required.

Applications:
- Offers protection of connections between steel pipes or scuppers to plastic pipes in non-pressurized systems.
- Applications were tested for common plastic and steel pipes or scuppers.
- Easily retrofittable around existing, mated pipes.
- No pre-planning or staging necessary with split closure design.
MCC

Cable Coating

This latex-based coating cleans up easily with water and is designed to protect grouped electrical cables against the propagation of fire.

MCC contains endothermic fillers that absorb heat and release water, limiting the spread of flames along cables and cable trays. The high solids coating eliminates shrinkage and adheres well to virtually all cable jacketing materials providing exceptional coverage rates.

Features & Benefits:
- Sand-able and paintable (when dry).
- Safe - low VOCs, no solvents, non-halogenated.
- Excellent sealing properties along with high build capabilities.

Applications:
- Offers protection of grouped electrical, data, or communications cables in cable tray or racked cable applications.
- Applied using airless spray equipment or by brush.

RTV Firestop Foam

This two-component RTV silicone foam features excellent crack-and-void filling capabilities and provides high resilience to accommodate vibration.

MRF is designed as a seal for both deck and bulkhead pipe penetrations, which when properly mixed, expands 2 to 4 times its original volume, filling available spaces and forming an effective barrier against fire, smoke, hot gas and water penetration.

Features & Benefits:
- Excellent water resistance, adhesion and smoke seal.
- Uniform cell structure ensures reproducible results every time. No charts to check!
- Minimal pressure during foaming virtually eliminates shrinkage.
- Elastic properties readily accommodate minor vibration of pipe and conduit.
- Soft setting foam for easy retrofitting of cables.

Applications:
- Applied in liquid form with proper damming and then foams in place, readily sealing around penetrating items such as conduits, cables, duct work or mechanical piping.
- Useful in sealing areas such as control rooms against infiltration of airborne contaminants such as coal dust and dirt.
- Ideal for use as a thermal or acoustical insulation, or for vibration dampening.

Tested to FM Approval Class 3971 for Grouped Electrical Cables that are nonflammable coatings and Category A of IEC publication 60332-3-22 and IEC 60331 and IEEE 383/1202.

Tested to IMO FTP Code 2010, Part 3 - Class A-0 to A-60.

*Consult Factory for Most Current Testing & Approvals.

### STI Marine - A Division of Specified Technologies Inc.

STI Marine, a division of Specified Technologies Inc., focuses on developing and manufacturing a wide array of systems for sealing penetrations through fire-rated bulkheads and decks. Safety of life at sea is paramount, and our fully IMO FTP compliant solutions are subject to Type Approvals by major Classification Societies to ensure peace of mind. In the shipyard production environment, we focus on solutions that are easier and more economical to install, saving the shipyard valuable production hours and enhancing productivity. For ship owners and operators, providing the best life-cycle cost matters, and many STI Marine solutions are maintenance-free and can allow for easy modifications while in dry dock, or at sea without disturbing passenger comfort or safety.

For over 25 years, STI has been the leader in developing innovative firestopping solutions – whether on land or at sea. Trust STI for Service, Technology, and Innovation; pillars for our success and yours!
Find Products & Support Worldwide

STI Marine Firestop Products are available worldwide through an integrated distribution network. Local STI offices are on call to provide unparalleled technical support for all of your project-specific conditions. Schedule time with an STI representative today to learn more about these great products and services. To do so, call us at +1 908.526.8000 or visit us online at www.stimarine.com.
